Uncle Sam asks you...

to get ready for the census taker

In January the U.S. Census Bureau will ask you about 1944 crops—amount—value—acres—livestock—tractors—labor hired and tenure

THE LAW REQUIRING YOUR REPORTS MAKES THEM CONFIDENTIAL

FATS HELP MAKE GUNPOWDER

a tablespoon each day from your kitchen will crush the Axis

WOMEN (left panel) waste cooking grease that makes the finished fats. While adding two drops per oil pounds (right) before going to work, some use the extra from the pan before eating grease. To meet our needs, every American must save one tablespoon of fat each day.

TELL THE FAT TO YOUR BUTTER. (Right) Tell your family and company members the use of grease which will save one to four cooking grams for conversion into glycerine. They will pay you for each pound of fat the price established by the official collection agency.

THE POINT WHERE FAT GOES TO BE REFINED. (Left) Fat is sent from a soap-making process. (Right) Fat is sent from a soap-making process. (Left) Fat is sent from a soap-making process. (Right) Fat is sent from a soap-making process.

WOMEN (right) collect waste cooking grease. (Left) Fat is sent from a soap-making process. (Right) Fat is sent from a soap-making process.

WASTE FATS HELP CRUSH THE AXIS. (Left) This American farmer sends from his farm a variety of animal fats. (Right) Fat is sent from a variety of animal fats. (Left) This American farmer sends from his farm a variety of animal fats. (Right) Fat is sent from a variety of animal fats.

DEAD ANIMAL FATS ARE USEFUL

Ranchers in the rural areas are prepared to process fats from dead farm animals. Your government needs this fat. You are urged to contact your nearest rancher to remove dead animals.

WHERE FAT GOES

One pound of waste fats equals 1/10 of a pound of glycerine. 1/10 of a pound of glycerine equals 1/3 of a pound of nitroglycerine. 1/3 of a pound of nitro-glycerine equals 1.3 pounds of gunpowder. 1/3 of a pound of nitro-glycerine equals 1/2 of a pound of dynamite. 50 pounds of waste cooking fats equals 3 pounds of glycerine, or enough to manufacture synthetic resin sufficient to produce enough camouflage to cover one medium tank.
